

Immunization Agenda 2030

How do we measure success?

THREE
IMPACT
GOALS

IMPACT GOAL #1

Prevent Disease

- 1.1 Save lives
- 1.2 Control, eliminate & eradicate Vaccine Preventable Diseases (VPDs)
- 1.3 Reduce VPD outbreaks

SEVEN
INDICATORS

IMPACT GOAL #2

Promote Equity

- 2.1 Leave no one behind
- 2.2 Provide access to all vaccines

IMPACT GOAL #3

Build Strong Programmes

- 3.1 Deliver across the life course
- 3.2 Contribute to Universal Health Coverage

IMPACT GOAL #1

Prevent Disease

INDICATORS

1.1

Number of future deaths averted through immunization

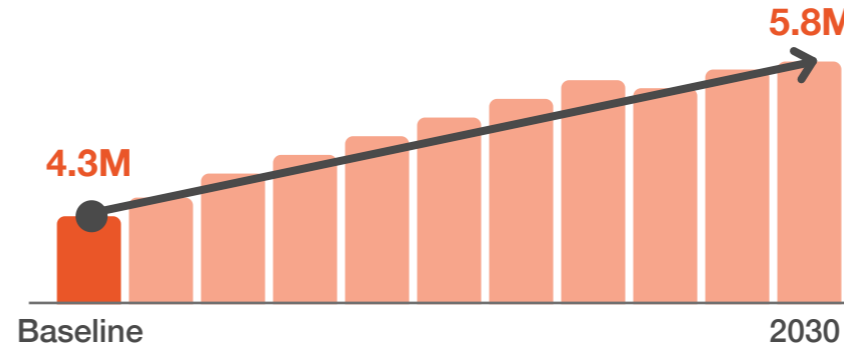

1.2

Number and % of countries achieving endorsed VPD control, elimination & eradication targets

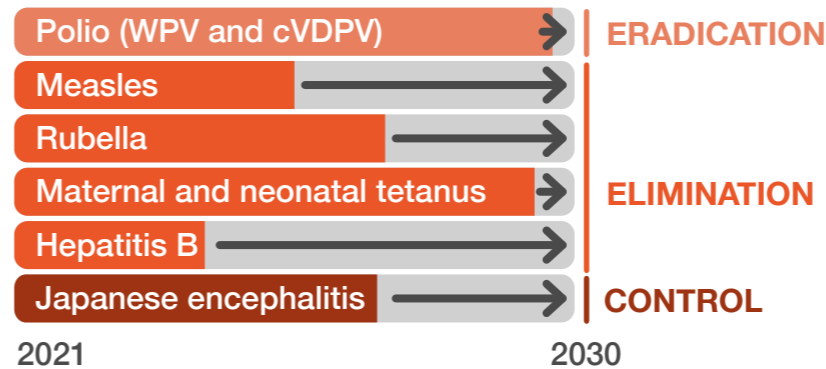

1.3

Number of large or disruptive VPD outbreaks

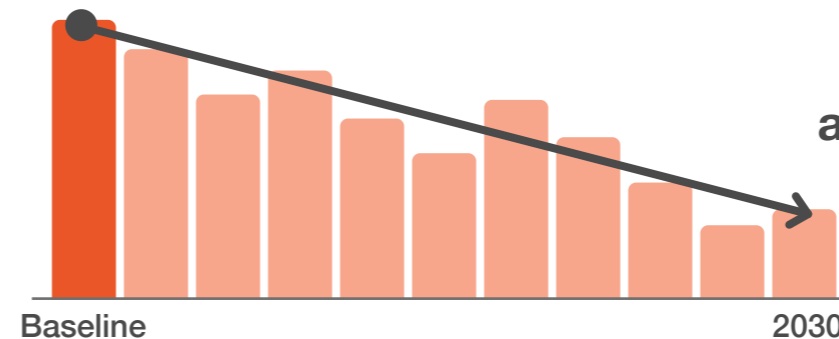

HOW GLOBAL PROGRESS WILL BE MEASURED

50 million future deaths averted from 2021–2030

All countries achieve endorsed targets*

Declining trend in the annual number of large or disruptive VPD outbreaks

*Selected disease targets and progress represented in this visual are illustrative only

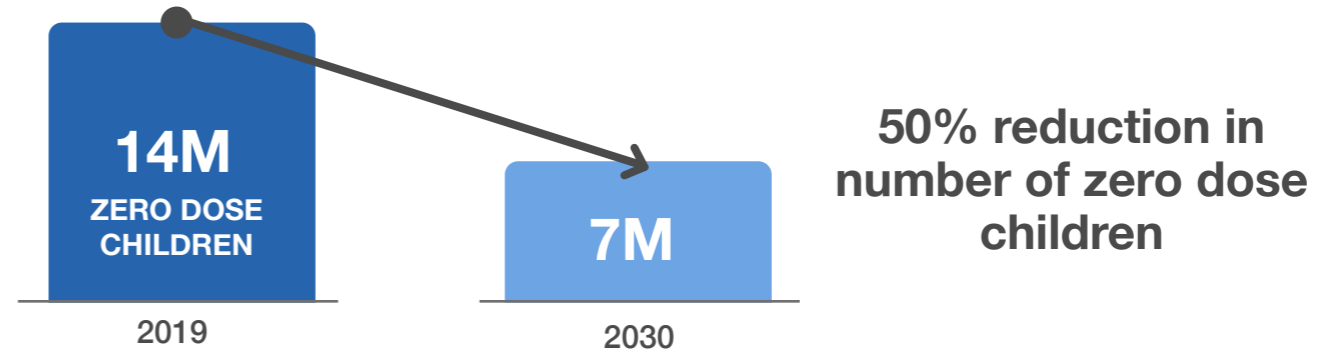

Promote Equity

INDICATORS

2.1

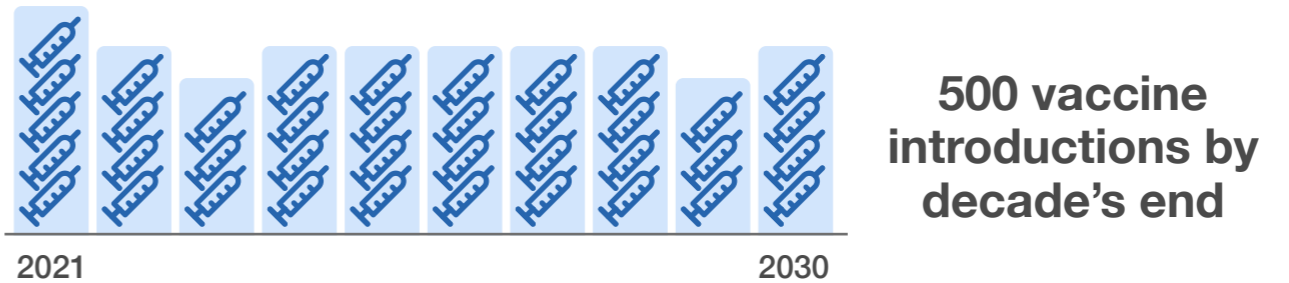

Number of zero dose children

HOW GLOBAL PROGRESS WILL BE MEASURED

2.2

Introductions of new or under-utilized vaccines in low and middle income countries

Build Strong Immunization Programmes

INDICATORS

3.1

Vaccination coverage across the life course

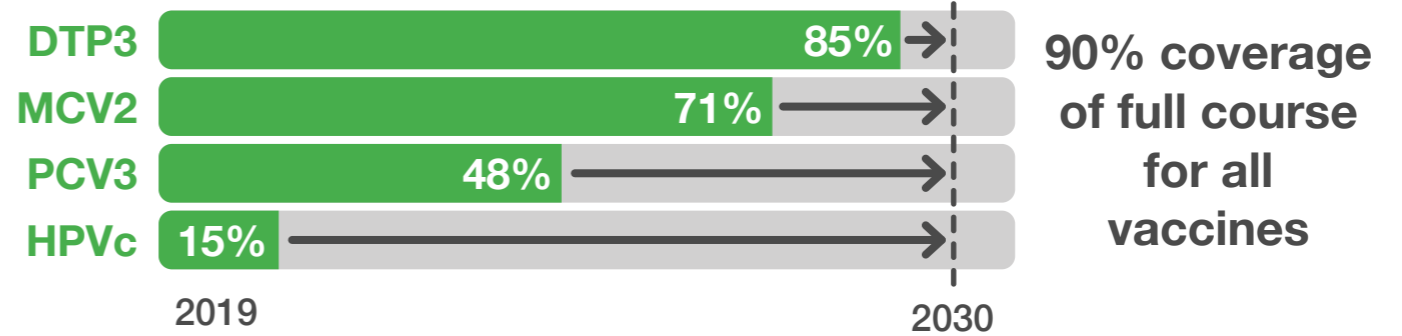

3.2

Universal Health Coverage (UHC) Index of Service Coverage

HOW GLOBAL PROGRESS WILL BE MEASURED

Universal Health Coverage increases in all countries
